WORK EXPERIENCE

Strugbits

Trainee Software Enginer   June 2023 - July 2024

- Utilized expertise in Node JS, React, and MongoDB to develop and deploy enterprise-grade web applications.
- Contributed to team projects as a backend developer, fostering collaboration and effective communication.

EDUCATION

University of Chitral

Computer Science   Jan 2019 - Jan 2021

- Achieved academic excellence by consistently earning good grades in all courses.
- Designed and developed a comprehensive final-year project, Clinic MS, showcasing expertise in building web applications using React, Fast API, and SQLite.

PROJECT

Poll Chain ↗   July 2022

- Designed and developed a blockchain-based voting application, enabling transparent and secure voting processes for both voters and administrators.
- Utilized React and FastAPI to create a robust frontend and backend infrastructure, respectively, and developed a custom blockchain solution to manage voting procedures.

Chat Application ↗   June 2023

- Developed a real-time chat application using the MERN stack (MongoDB, Express, React, Node.js), incorporating Socket.io for seamless communication.
- Real-time Communication: Implemented real-time messaging and video chat functionalities using Socket.io, enabling instant user interaction.
- Database Integration: Utilized MongoDB to store and retrieve chat history, user data, and other relevant information

News Portal ↗   Feb 2023

- Implemented features like real-time news feeds and rich text editor.
- Ensured mobile responsiveness for optimal user experience.
- Optimized performance and cross-browser compatibility.

SKILLS

Vanilla JS, React, Next JS, Expres, Svelte
HTML, CSS, Tailwind CSS
Python, Django, FastAPI
